DOMAIN EXPERTISE

8

skill scale from 0 (Fundamental Awareness) to 10 (Expert)

SKILLS & KNOWLEDGE

archaeology | cultural heritage

advanced computer user

MOTIVATIONS

extend the existing model

fast development of a new system

FRUSTRATIONS

limited knowledge about ODCMs

no clear understanding of CMs

VALUES & ASPIRATIONS

deep knowledge of the domain

clear view of the future system

BASIC SCENARIO OF USAGE

Quite recently Laura received a suggestion to update the existing system her team is using for their research, in order to make it more user-friendly and open to future projects and collaborations. She was suggested to extend an existing ODCM, and to adapt it to the demands of the future system.

EXPECTATIONS

Laura is working as an archaeologist for all of her life. She is not afraid of new technologies and is inspired by possible opportunities, but at the same time is scared that her level of computer expertise will not be enough to help with the new system's development.

OBJECTIVES AND GOALS

Laura wants to help with the development of a future system in the domain of her expertise. She can help with an understanding of users' demands but does not want to dive into the details of the development process.

ATTITUDES TOWARDS EXPO

Laura would like the system to help with guiding her through the process of working with ODCM.
